AccuTrack contact heart-rate monitoring option displays your heart-rate without the need for wearing a chest-strap.

Hand-held remote stop-start switch option is ideal for when therapists need to manipulate the patient's legs while remaining in control of treadmill operation.

Treadmill stops when patient-attachable safety lanyard is pulled.

Rehabilitation Specifications

From treating the most acute neurological or post-operative conditions, to training world-class athletes, the Landice Rehabilitation Treadmill is the world's most versatile solution for rehabilitation, physical therapy and sports conditioning.

Rehabilitation Treadmill Features

- Zero starting speed
- Extended parallel medical handrails

- 0.1 to 12.0 mph (0.2 to 19.3 km/h) speed range
- Ultra high-torque drive
- 4 HP continuous-duty motor
- 15% elevation
- VFX shock absorption system
- Patient-attachable safety lanyard
- 1-inch (2.54 cm) thick reversible deck
- Rust-free aluminum frame

High-Tech Entertainment Center

- High powered stereo speaker
- Personal cooling fan
- iPhone, iPod or MP3 connectivity
- PodGrip™ holds device in place
- Water bottle holder
- Accessory pocket

L8 Rehabilitation Treadmill Highlights

- 22" x 63" (55.9 x 160 cm) four-ply treadbelt
- Low 7-1/2" (19.1 cm) step-up height
- 3-1/2" (8.9 cm) diameter, 22-pound (10 kg) steel rollers
- 500-pound (226.8 kg) user weight capacity
- 36" x 83" (91.4 x 210.8 cm) footprint

L7 Rehabilitation Treadmill Highlights

- 20" x 58" (50.8 x 147.3 cm) four-ply treadbelt
- Low 5-1/2" (13.9 cm) step-up height
- 2-1/2" (6.35 cm) diameter, 14-pound (6.4 kg) steel rollers
- 400-pound (181.4 kg) user weight capacity
- 36" x 76" (91.4 x 193 cm) footprint

Rehabilitation Treadmill Options

- Reversing belt direction with hand-held remote stop-start switch
- Hand-held remote stop-start switch
- L7 Orthopedic Suspension System
- L8 Orthopedic Suspension System
- 100 micro-amp Hospital Isolation Leakage Kit
- AccuTrack contact heart-rate monitoring system
- 220 VAC, 15A, 60/50 Hz

International Warranty: 5 year parts*

Electrical Requirements: 120VAC, 60HZ, 15A

Certifications: ETL certified to UL-1647 and CAN CSA 22.2 no. 68

*Designed for use in rehabilitation settings. Heavy use pay-for-membership facilities such as health clubs, gyms, and YMCA's are not eligible for this warranty program.
